

RELAYSPEC: ADAPTING FROZEN SPECULATIVE DRAFTERS THROUGH LINEAR FEATURE INTERFACES

Anonymous authors

Paper under double-blind review

ABSTRACT

Structural starter for section-by-section drafting. Replace this paragraph with the verified problem, approach, quantitative findings, and scope after completing the evidence audit. This document is not a submission-ready manuscript.

1 INTRODUCTION

Drafting note: Problem, motivation, shared interface idea, two adaptation settings, and three supported contributions.

2 RELATED WORK

Drafting note: Feature-conditioned drafting; draft adaptation and reuse; linear interfaces and structural re-parameterization.

3 BACKGROUND AND PROBLEM FORMULATION

Drafting note: Define target, reference model, drafter, feature interface, frozen parameters, and both adaptation settings.

4 RELAYSPEC

4.1 LINEAR FEATURE INTERFACE

Drafting note: Feature maps, dimensions, normalization, initialization, and training/export overview figure.

4.2 ADAPTATION TO FINE-TUNED TARGETS

Drafting note: Target-generated supervision, attributed objective, and gradient flow.

4.3 CROSS-MODEL TRANSFER

Drafting note: Feature pairing, reconstruction objective, and tokenizer alignment.

4.4 EXPORT AND INFERENCE

Drafting note: Folding, runtime selection, cache semantics, and correctness assumptions.

5 EXPERIMENTS

5.1 EXPERIMENTAL SETUP AND METRICS

Drafting note: Models, datasets, splits, selection, baselines, hardware, decoding, and metric denominators.

5.2 ADAPTATION TO FINE-TUNED TARGETS

Drafting note: Matched specialization results and strongest adaptation controls.

5.3 CROSS-MODEL TRANSFER

Drafting note: All transfer directions, workload variation, native recovery, and missing controls.

5.4 SHARED SERVING AND ADAPTATION COST

Drafting note: Concurrency, per-request versus aggregate throughput, and measured cost with exclusions.

6 ANALYSIS AND LIMITATIONS

6.1 INTERFACE AND OBJECTIVE CONTROLS

Drafting note: Interpret matched evidence and identify remaining confounds.

6.2 MECHANISTIC INTERVENTIONS

Drafting note: Identity preservation, directional corrections, reconstruction interventions, and counterexamples.

6.3 SUPERVISION AND COST TRADEOFFS

Drafting note: Data, anchors, coverage, checkpoint selection, and fitting cost.

6.4 LIMITATIONS

Drafting note: Final verified scope, failure regimes, statistical limits, and reproduction gaps.

7 CONCLUSION

Drafting note: Answer the central research question without introducing new claims.

AI USE STATEMENT

Drafting note: Accurate disclosure of actual AI uses and author verification; also complete the submission form.

ETHICS STATEMENT

Drafting note: Relevant impacts, data provenance/privacy, and application limits.

REPRODUCIBILITY STATEMENT

Drafting note: Point to specific available recipes, code, manifests, and proof details.

REFERENCES

Drafting note: Add verified author-year references using the official bibliography style.
